# DELIVERING THE COMPONENTS THAT SUPPORT OUR WORLD.

## ABOUT US

Since 1973, PUPCO has been serving the needs of electrical and mechanical distributors throughout the United States. Today, PUPCO is the industries' go-to wholesale distribution partner, with large state of the art facilities in Charlotte, North Carolina and in North Jackson, Ohio.

PUPCO is excited to introduce our new and improved catalog to our customers, both new and old. Inside these pages you will find a sampling of the products and finishes available. Please contact your sales representative for any needs which are not represented. We likely have the product on-hand, or we can get it for you in short order.

Our vast inventory includes hard-to-find electrical and mechanical infrastructure items in various finishes, with which we can fulfill your just-in-time, stocking, dedicated inventory, and direct shipping needs.

With a total of over 85 years of helpful and knowledgeable sales experience, we are here to assist our customers to ensure they have the products needed to keep their customer's construction jobs running on time and on budget. Contact us today and let's get to work **delivering the components that support our world.**

# STRUT CHANNEL SYSTEMS

Strut Channel Systems are continuous, fully adjustable, and reusable support systems which are used to meet a wide variety of construction needs. These systems are strong, easy to assemble and fully customizable, **requiring no special tools, welding, or drilling.**

# STRUT CHANNEL OVERVIEW

- **Installs Quickly**
- **Adjustable to Fit Any Need**
- **No Drilling, Welding or Special Tools Needed**

Strut Channel framing systems provide continuous, fully customizable, metal channels and fittings to suit a myriad of construction needs, including support for sprinkler systems, electrical conduit or other piping, erection of scaffolding, mezzanines, walkways or guardrails and in the installation of conveyor systems, solar farms or data centers.

Concrete Insert Strut Channel provides a continuous slotted channel in floors, walls or ceilings.

## SAW

Strut Channel is easy to cut to desired lengths with a hack saw, chop saw, or powered band saw. Or let us do the work for you! Speak with your sales representative about our

cutting and kitting services. We have the tools to cut Strut Channel to the desired lengths and we can bundle the pieces into kits for easy job-site installation.

## WRENCH

Channel Nuts are inserted parallel to the Strut Channel and are then depressed and twisted to fit under the in-turned edges of the Strut Channel. The Channel Nut may be slid to any location on the channel, allowing for complete adjustability. When released, the Channel Nut will lock in place. Channel Nuts with springs are designed to hold the Channel Nut in place during assembly.

Fittings or Brackets are placed on the face of the Strut Channel over the Channel Nut. Hex Head Bolts are used to attach the Fittings or Brackets to the Channel Nuts, thereby locking the assembly in place.

### FASTENER

A Hex head bolt connects the fitting to the channel as it is threaded into the channel nut.

*You can find FASTENERS on page 68*

### FITTING

A wide variety of Fittings can be attached to channel, proving maximum flexibility and functionality.

*You can find FITTINGS starting on page 22*

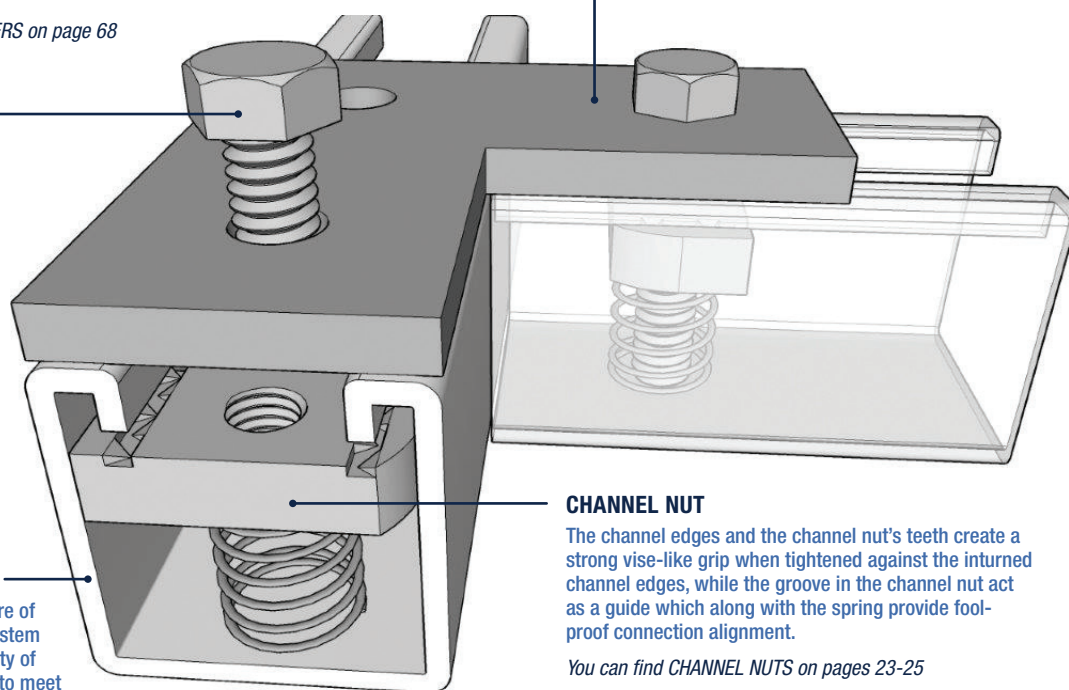

### STRUT CHANNEL

Strut channel, the core of a channel framing system is available in a variety of profiles and finishes to meet any project's needs.

### CHANNEL NUT

The channel edges and the channel nut's teeth create a strong vise-like grip when tightened against the intumed channel edges, while the groove in the channel nut act as a guide which along with the spring provide fool-proof connection alignment.

*You can find CHANNEL NUTS on pages 23-25*

# STRUT CHANNEL SYSTEMS

Strut Channel Systems are designed to support mechanical and electrical infrastructure in industrial and commercial applications by providing a framework to which to mount, support, brace, or connect electrical and data wires, pipes, ventilation systems, etc. Strut channels are manufactured by a series of forming rolls, which slowly work the steel into the desired channel shape. PUPCO offers unmatched product availability in standard and hard-to-find profiles and finishes to keep our distributor's customer's projects on schedule and on budget.

## PERFORATION OPTIONS

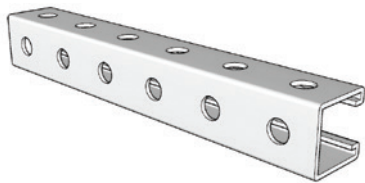

### OBLONG SLOT [OS]

Oblong Slot Channel has 9/16" x 11/8" slots, 2" on centers. Oblong Slot Channel is the most used functionality as it allows for the most flexibility when attaching fittings and fasteners.

### ROUND HOLE [RS]

Round Hole Channel has 9/16" (3/4") diameter holes, 1 7/8" on centers. Round Hole Channel is used for symmetrical spacing of fittings and fasteners.

### ROUND HOLE - 3 SIDES [RS3]

Round Hole Channel - 3 sides has 9/16" (3/4") diameter holes, 1 7/8" on centers on all three sides of the channel. Round Hole Channel is used for symmetrical spacing of fittings and fasteners. Having the holes on all three sides allows for multi-directional attachment of fittings and fasteners.

### KNOCK OUT [KO]

Knock Out Channel has partially drilled 7/8" diameter holes, 6" on centers. Knock Out Channel is used in applications where holes are 'knocked out' where needed.

### SOLID

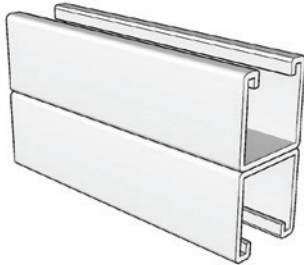

Solid channel is the strongest of the available options and is used in applications where holes are not required or drilled to suit the needs of the project.

### SPECIALTY

Other functionalities, i.e. 4" on center slot and rectangular slot are available on request. Please contact us, we are happy to assist.

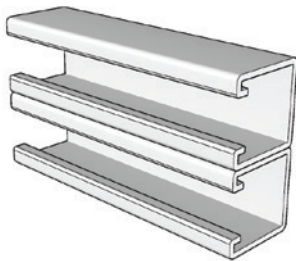

## WELDED COMBINATION

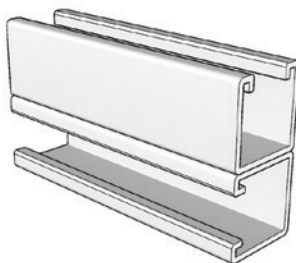

### BACK TO BACK (A)

Back to Back Channel is two pieces of channel of a given size and gauge, where the backs are spot welded together at either 2" or 3" centers forming openings on the top and bottom of the channel.

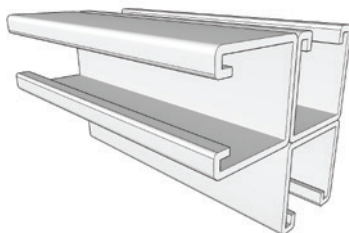

### SIDE TO SIDE (B)

Side to Side Channel is two pieces of channel of a given size and gauge, where the sides are spot welded together at either 2" or 3" centers forming openings on either the same side of the channel or opposite sides of the channel.

### SIDE TO BACK (C)

Side to Back Channel is two pieces of channel of a given size and gauge, where the side of one piece of channel is spot welded to the back of the other piece of channel at either 2" or 3" centers forming openings on the top and side of the channel.

### CUSTOM COMBINATIONS

Many other combinations of channel are available including 3 and 4 piece combinations. Call us with your needs and we will be happy to help.

# FIBERGLASS CHANNEL

Fiberglass Channel is a non-metallic, lightweight, yet strong and supportive Strut Channel framing system that is resistant to corrosion and flame retardant.

PUPCO also offers Fiberglass Fittings, Fasteners and Accessories to complete framing systems as required by job specifications. Please look for the FG finish throughout the

catalog. Please also contact your sales representative who will be happy to source needed fiberglass products.

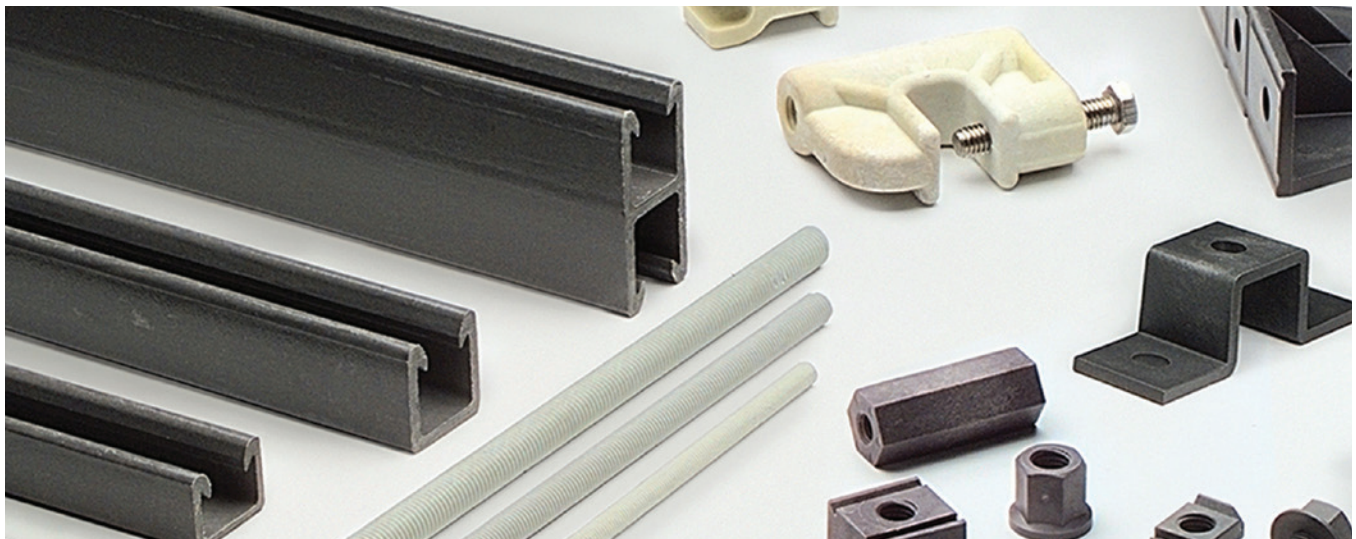

PUPCO offers the full line of Aickinstrut Products. Aickinstrut profile fiberglass strut is compatible with Aickinstrut fittings only. Aickinstrut standard profile (SST) is compatible with standard strut pipe clamps and fittings.

				FINISH OPTIONS

## AVAILABILITY

SS: Standard stocking item. \*: Please contact us for availability.

Please include MTR requests on initial RFQ. Spec sheets are available on request.

# CUTTING & KITTING

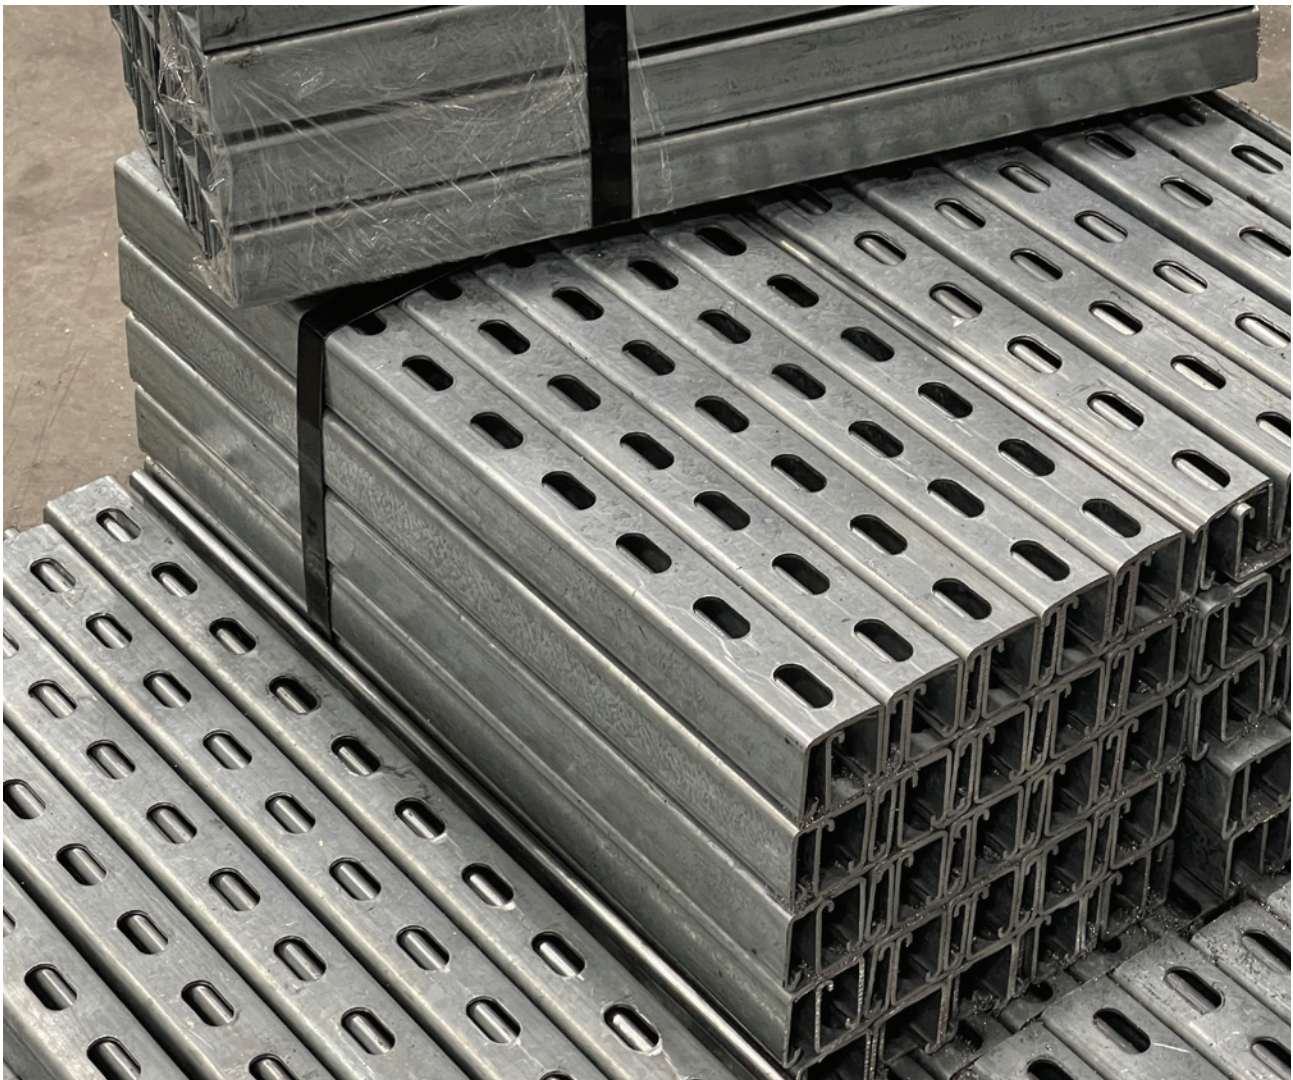

PUPCO offers Cutting and Kitting services whereby we can cut and bundle Strut Channel to desired lengths. This saves time and money when the material arrives to your customers job-site ready to install. We also bundle kits of Strut Channel, Fasteners and Fittings so that they can be readily distributed at the job-site. Please contact your sales representative for details.

## TERMS AND CONDITIONS LANGUAGE

When cuts are from standard stock lengths of 10 feet or 20 feet, customers will be charged for the full length of material. Cut material is non-returnable. Scrap material will only be shipped upon request. Cutting charges will be invoiced as a separate item and vary depending on total quantity of strut and number of cuts.

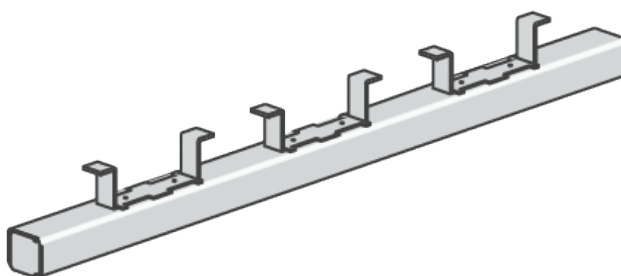

## CUTTING AND KITTING BENEFITS

- Material arrives ready for install and on-site distribution
- Reduce waste on site
- Minimize material prep time and on-site labor expense
- Ensure consistency of cut and length

# CONCRETE INSERT STRUT CHANNEL

Concrete Insert Strut Channel is used to create a continuous slotted channel in concrete floors, walls, or ceilings. Concrete Insert Strut Channel is supplied and end cap and either foam filler or a plastic strip to prevent concrete.

In addition to the offerings illustrated, hundreds of other channels are available for specific applications.

The background of the entire page is a close-up, slightly blurred photograph of several threaded rods. The rods are arranged in a way that creates a sense of depth, with some in sharp focus in the foreground and others receding into the background. The lighting is even, highlighting the texture of the threads.

# THREADED

# ROD

Rod is used to pin, fasten, or connect two materials together and is an integral part of strut channel framing systems. **PUPCO offers Full Body Threaded Rod, Solid Body Rod and Studs.**

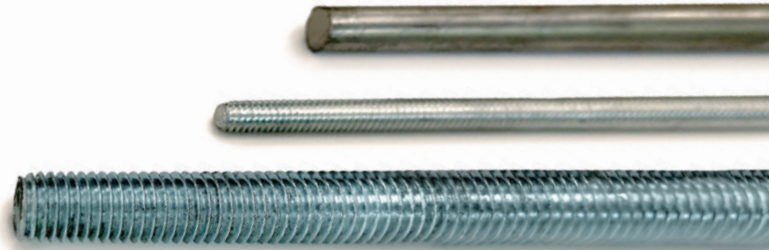

# THREADED ROD OVERVIEW

Threaded Rod is continuously threaded from one end to the other for use as a fastener in Strut Channel Systems and countless other construction and manufacturing applications. Threaded rod is available in many finishes, diameters, and lengths. Finishes include Hot Dipped Galvanized Steel, Stainless Steel, and Fiberglass, each of which serve specialized construction requirements. Typical diameters are 1/4", 3/8", 1/2" and 5/8", but we also stock many other diameters. Threaded Rod is available in standard lengths of 6, 10 & 12 feet.

PUPCO offers both Full Thread and Solid Body Rod. Solid Body Rod does not have threads and is typically used in applications where 'wash-downs' are mandatory. Contractors thread only the portion of the rod needed, leaving the remaining length solid to provide a washable surface.

PUPCO also offers fasteners to support Threaded Rod installation, including rod couplers, reducing rod couplers and rod end caps.

**If you have a specialized need, please contact your sales representative they will be happy to source the needed product.**

# CABLE TRAY

We exclusively offer **US Tray**  
**cable tray solutions.** US Tray  
is the go-to ladder cable tray  
manufacturer known for high quality,  
trusted products made in America.  
US Tray is well-known by industry  
experts worldwide, serving a global  
customer base.

# CABLE TRAY OVERVIEW

## US TRAY

US Tray's I-Beam Ladder Cable Trays are a core solution and iconic design in the cable tray industry, making it the most common cable tray solution. I-Beam Ladder Cable Trays feature 3-inch tangents and are easily connectible with fittings and accessories.

## WHY ALUMINUM

Aluminum is the preferred material for cable tray as it is sturdy while being lightweight and resistant to corrosion. Aluminum cable tray works in many settings and is easy to install and maintain.

## BENEFITS

- Aluminum Cable Trays are the most economical choice for creating ideal routing paths for cables.
- Aluminum Ladder Cable Trays have a rung design that enables cables to be tied down or to exit the path where necessary.
- Aluminum Ladder Cable Trays promote ventilation and prevent the accumulation of dust, debris and moisture.
- Aluminum Ladder Cable Trays allow for easy additions and movement of powered equipment by allowing for open cable access.
- Aluminum Ladder Cable Trays are designed for ease of use by construction and electrical professionals, while protecting the cables from unauthorized access.
- Aluminum Ladder Cable Tray solutions can be seamlessly modified, extended, or removed.

**Atkore**  
US Tray

## AVAILABILITY

PUPCO stocks a wide variety of common components for ladder cable tray systems to meet your customers' immediate needs. For special project needs, contact your salesperson and we'll consult with you to determine the best product fit and delivery to meet your timeline.

# ALUMINUM LADDER TRAY

**Atkore**  
US Tray

## ALUMINUM LADDER TRAY

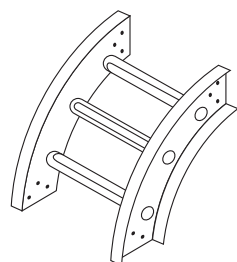

Aluminum Cable Trays are the most common cable tray solution used for protecting and supporting power and control cables. The trays mimic the rungs of a ladder and are installed horizontally or vertically. Aluminum Cable Trays are ideal for holding and managing larger cables and are often used in the construction and upgrade of automotive, power, commercial, oil and gas, and industrial projects.

## FLEXIBILITY

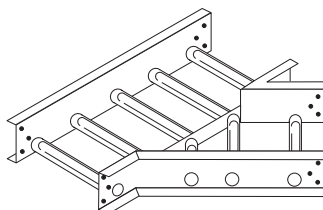

To ensure cable tray solutions meet your customer's design specifications, we offer a vast array of ladder tray fittings including but not exclusively the list below:

- **Horizontal Elbows**
- **Vertical Elbows**
- **Tees**
- **Reducers**
- **Cross Pieces**
- **Branches**

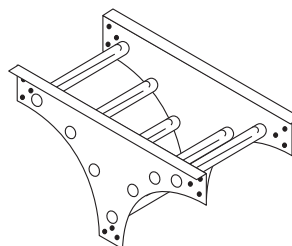

Our team is happy to provide guidance and assistance on which fittings to choose to meet both basic and complex project needs.

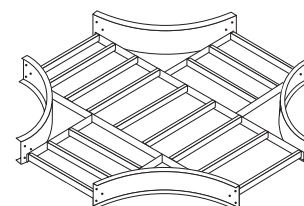

OUTSIDE VERTICAL

RIGHT BRANCH

LADDER VERTICAL TEE

HORIZONTAL CROSS

## INDUSTRY STANDARDS

US Tray manufactures ladder cable solutions to meet the highest industry standards:

- **UL-classified, UL-listed**
- **Meet National Electrical Manufacturers Association (NEMA) VE-1, metal cable tray standards.**
- **Aluminum cable trays meet NEMA loading requirements, crafted in extruded 603-T6 material**

## CABLE TRAY FITTINGS CLASSES

**Class 1:** Designed for use with NEMA Classes 12B and 12C cable trays. These systems have 1 1/8" wide side rail flanges and 4-hole splice plates.

**Class 2:** Designed for use with NEMA Classes 20A, 20B, and 20C cable trays. These systems have 2" wide side rail flanges and 4-hole splice plates.

**Class 3:** Designed for use with NEMA Classes that exceed 20C. These systems have 2 3/8" wide side rail flanges and 8-hole splice plates.

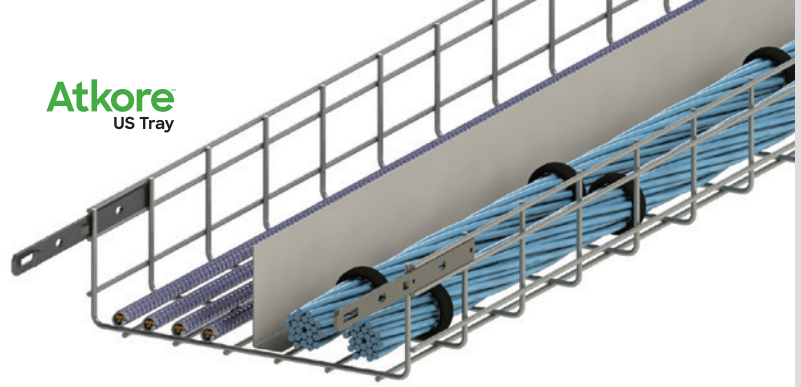

**Class 4:** Designed for use with A820E cable tray systems, which are 8" high. These systems have 2 3/4" wide side rail flanges and 8-hole heavy-duty splice plates.

## AVAILABILITY

Many other fittings are available, please contact your sale rep for details.

# BASKET TRAY

Atkore  
US Tray

## US TRAY

US Tray's Wire Mesh Basket Trays are designed as an affordable solution to keeping cables in order and protected. Wire basket cable trays are crafted from strong and durable steel wire, welded to create a 2" x 4" grid. Wire mesh is a durable yet lightweight solution for cable support.

## FINISHES

For the majority of indoor applications, electro-plated zinc galvanized finish is the preferred material for Wire Mesh Basket Trays.

For outdoor applications, corrosion resistance can be increased by using 304 or 316 stainless steel or with a powder coated solution in your choice of color.

## SIZING

Standard Wire Mesh Basket Trays are 10' long and either 2", 4", or 6" deep to meet a variety of installation needs. All depths are offered in 24' widths.

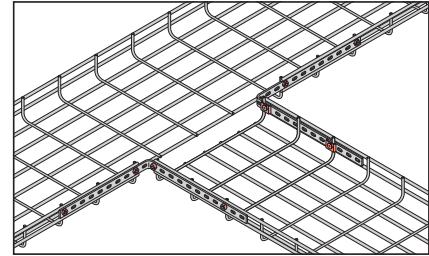

## BENEFITS

- Wire Mesh Basket Trays keep cables cool by allowing air to flow freely and dissipate heat. They also help prevent the buildup of debris and dust that can gather along cable lines with time.
- Also known as datacenter trays, Wire Mesh Basket Trays are ideal for use with communication cables, signal cables, fiber optics, ethernet, low-voltage cables or in a telecom setting. However, Wire Mesh Basket Tray is also perfect for use in offices, hospitals, hospitality, industrial manufacturing, educational, pharmaceutical and food processing applications.
- Wire Mesh Basket Trays have a self-splicing solution which makes them easy to connect, resulting in reduced manual labor cost.
- Wire Mesh Basket Trays are easy to customize, modify, extend, expand, or remove.
- To ensure your Wire Mesh Basket Tray solution is designed for your application, we offer a vast array of fittings and accessories. Most of which are built with Quick-Latch technology allowing the system to fit and fasten perfectly with no tools required.

# POST BASES

Post Bases are designed to fit with all 1-5/8" wide channels, single or double.  
Post Bases are manufactured from 1/4" thick carbon steel and have holes 9/16" diameter and are spaced 1-7/8" on center and 13/16" from the end.

## ANGLE FITTINGS - HINGED

The edges of hinged fittings are designed to provide an alignment guide for 0, 45 and 90 degree installation as shown in the drawings below. This eliminates the need for measuring gages.

The fittings are hinged with a Grade 5 bolt and nylon insert locknut for superior strength and to prevent loosening of the hinge.

## HINGE CONNECT OR AUTO-ALIGNMENT GUIDES

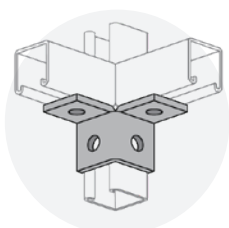

The unique edges of the two hinges have been designed to provide an alignment guide for 0°, 45° and 90° as shown in the drawings below.

This eliminates the need for measuring gages.

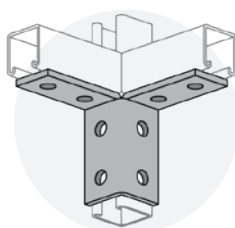

- Each half of the hinge is formed and welded for maximum strength.
- Hinged with Grade 5 bolt for superior strength.
- The nylon insert locknut prevents loosening of the hinge.

PUPCO proudly offers Hydra-Zorb Cushion Clamps. Invented in 1966, Hydra-Zorb Cushion Clamps are the original cushioned strut clamp. These clamps are typically used in plumbing, hydraulic, pneumatic, and HVAC applications where damage from pipe movement is a concern. Hydra-Zorb Cushion Clamps secure uninsulated tube and pipe runs against damage from shock, movement and vibration, eliminating metal to metal contact. The cushion material is thermoplastic elastomer, which is rated from -65 degrees to +275 degrees Fahrenheit.

*Cushion Clamps continued on next page.*

## FINISH OPTIONS

**EG:** Electro Galvanized    **HD:** Hot Dipped Galvanized Steel  
**GD:** Gold-Zinc Trivalent Chromium    **SS4:** Stainless Steel 304  
**SS6:** Stainless Steel 316

## AVAILABILITY

**SS:** Standard stocking item.    \*: Please contact us for availability.

In addition to the offerings illustrated, hundreds of other U-Bolts are available for specific applications.

Other U-Bolts available include Light Duty and Square.

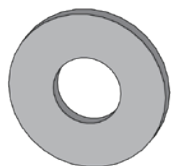

# FASTENERS

**PUPCO maintains a stable of key fasteners utilized in our strut channel and mechanical support systems.** Contact your sales representative for your fastener needs and we can also help you source hard to find fasteners for special projects and harsh environments

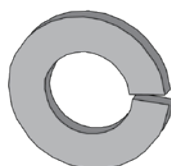

# FASTENERS OVERVIEW

## FLAT WASHER

Flat washers are also known as plain washers. The purpose of this type of a washer is to distribute the fastener's load while reducing heat and friction during the tightening process. They can also be used as spacers and to provide electrical insulation.

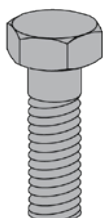

## LOCK WASHER

The purpose of a lock washers is to distribute the fastener's load while reducing heat and friction during the tightening process. Lock washers are used in lieu of a flat washer in applications where there is a tendency for the fastener to rotate or lose friction as a result of vibration or torque.

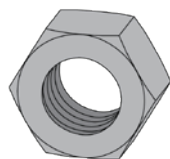

## FENDER WASHER

Fender washers are a type of flat washer. Fender washers have a larger outside diameter as compared to the inside diameter. This allows the washer to distribute loads to a larger area when compared to a flat washer.

## HEX HEAD SCREW

Hex head cap screws have a thick, hexagonal head with a washer face under the head to provide ample bearing surface for tightening with a wrench. Hex head cap screws are general purpose threaded fasteners designed for use in pre-tapped holes, or for use with nuts.

## HEX NUT

Hex nuts are general purpose fasteners used to fasten a bolt or screw to another object. A hex nut's hexagonal shape allows for ease in grasping and tightening.

## WEDGE ANCHOR

A wedge anchor is a mechanical expansion anchor that consists of a threaded anchor body, an expansion clip, a nut and a washer. Wedge anchors are used to connect structural and non-structural elements to concrete.

### FINISH OPTIONS

**EG:** Electro Galvanized    **HD:** Hot Dipped Galvanized Steel  
**SS4:** Stainless Steel 304    **SS6:** Stainless Steel 316  
**AL:** Aluminum    **GD:** Gold-Zinc Trivalent Chromium

### AVAILABILITY

**SS:** Standard stocking item.    \*: Please contact us for availability.

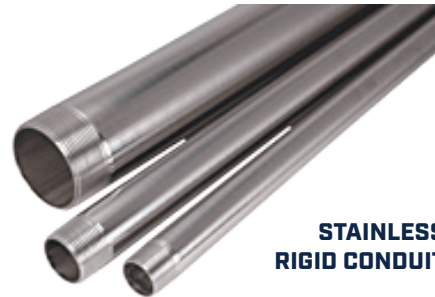

Square washers can be found with the Flat Fittings.

In addition to the offerings illustrated, hundreds of other fasteners are available for specific applications.

# MISSION STATEMENT

**PUPCO delivers mission-critical electrical and mechanical infrastructure products with industry leading product availability, ship times, and unparalleled expertise and customer service so that our customers can focus on their core business.**

# MEET OUR SALES REPS

**PUPCO  
SOUTH**

**TIM W.**  
**T.WILLIAMS@PUPCO.COM**  
**704.375.0776**

Tim is a strategic account specialist who works in collaboration with electrical and mechanical manufacturers and manufacturer's representatives in the southeast United States since 1979. Tim is a valued PUPCO team member offering expertise in raceway and support solutions. Tim is a native North Carolina resident who is married with two children. He is an outdoor enthusiast; his favorites include golf, hiking and camping.

**PUPCO  
SOUTH**

**TONYA S.**  
**T.SLAGLE@PUPCO.COM**  
**704.375.0776**

Tonya is an enthusiastic sales associate with over 7 years of experience in the sale and distribution of electrical and mechanical components. Throughout her career she has earned the trust of her customers and has maintained strong relationships to generate repeat business. She attributes her success to her ability to listen to customers and put their needs first. Outside of work, Tonya enjoys traveling and spending time with her two boys, family and friends.

**PUPCO  
SOUTH**

**ANDREW P.**  
**A.PICKETT@PUPCO.COM**  
**704.375.0776**

Andrew has worked in the mechanical and electrical industry for over 13 years. He seeks to exceed his customer's expectations by providing expertise, timely responses, and an exceptional level of customer service. Andrew's hard-working and detail-oriented nature make him a valued resource to his customers. In his free time, Andrew enjoys long walks, hiking and spending time with his young daughter and wife.

**PUPCO  
SOUTH**

**TYLER R.**  
**T.RIGGINS@PUPCO.COM**  
**704.375.0776**

Tyler is a results-oriented sales representative with over 10 years of professional experience in the electrical industry offering in-depth knowledge of electrical products and components. He is committed to improving team quotas and exceeding meaningful goals. Tyler prides himself in executing successful relationships with his customers. He is solution focused and always goes the extra mile for his clients to ensure their satisfaction. In his free time he enjoys grilling, spending time outdoors with his wife and young daughter.

**PUPCO  
NORTH**

**SALLY K.**  
**S.KELLAR@PUPCO.COM**  
**330.992.2823**

Sally Kellar is an enthusiastic and outgoing General Manager at PUPCO North. With 22 year's experience of selling channel accessories, she has built a good rapport with her customers. She has been able to find special items for her customers when in need. Throughout her career she has earned the trust and respect of her customers which has led to many friendships and repeat business. When Sally is not working, she enjoys fishing, motorcycle riding with her husband, and spending time with her family and grandkids.

**PUPCO  
NORTH**

**TIFFANY B.**  
**T.BACHHOFER@PUPCO.COM**  
**330.992.2823**

Tiffany cares about her customers and goes above and beyond to make sure she provides them with the best pricing and service. Tiffany is a 10 year sales veteran and has built a great relationship and rapport with many companies in this industry. She is a very hard worker and strives to do her best to make your job easier. She is fun loving and caring, and in her spare time she loves to be with her daughter and family. She has a positive attitude and great work ethic, and will provide the best service consistently.
